**Risk Information  
Sharing Consortium**

**The National League of Cities Risk Information Sharing Consortium (NLC-RISC)** is your trusted resource and connection for information sharing, expertise, and thought leadership in pooling. We provide tools, resources, and partnerships to help your pool make the communities you serve safer and stronger.

**Join a member-driven, member-focused organization dedicated to the success and support of State League Risk Pools.**

NLC-RISC is focused on supporting state league risk pools to make cities, towns, and villages in their state better places to work and live. We do this by facilitating a dynamic hub of mutual support and problem-solving through information-sharing, leadership development, and education on operational excellence and emerging national issues.

**We share your beliefs and mission:**

**Sharing** risk and learning together

**Protecting** public employees and the communities they serve

**Educating** local government leaders on safety and risk management

**Providing** high quality service, programs, and coverage at a fair and stable price

NLC-RISC offers many benefits for its members, including useful and interesting conferences and knowledgeable, helpful staff. The most important benefit it provides, though, is the opportunity to connect with peers from other pools.

## Learn from your peers and collaborate to solve common issues and challenges.

Few professional organizations are actually structured to deliver on their promise to promote cross-organization sharing of ideas; NLC-RISC achieves this better than any other organization I have been a part of. Public entity risk pooling is a unique concept in which decision makers often face situations with no comparison in the private sector. I can say honestly that NLC-RISC is the best professional organization I am a part of. The success of NLC-RISC is a powerful reminder that through partnership we can serve communities (whether our own or elsewhere) to advance the common good and effect positive change.

TEXAS MUNICIPAL LEAGUE INTERGOVERNMENTAL RISK POOL

Now more than ever, the complexities facing our jurisdictions in cyber risk, PTSD, and high-cost health care claims places the services provided by NLC-RISC at an all-time high. NLC-RISC has the unique resources at its fingertips with its sponsoring organization NLC to truly know the issues facing local government, municipal leagues, and the league-sponsored pools, and to facilitate innovative, results-oriented conversations to address these unforeseen trends. From our perspective, we can't afford *not* to be a member.
